INTRODUCTION

THE following lists, far from exhaustive, will give a fair idea of the literature on the important subject of Vocational Direction.

They are intended to aid those who desire to organize small vocational libraries in schools, colleges, shops, settlements, and wherever a nucleus of such reading matter will help in the study of choosing a vocation.

The Vocation Bureau will appreciate suggestions of other books and periodical articles that may be added in subsequent issues of this pamphlet. It will be particularly glad to learn of experiences with such special libraries wherever opened.

MEYER BLOOMFIELD.

SOURCES: Catalogues of Lenox Library, Columbia University Library, Harvard Library, Boston Public Library, British Museum, American Library Association, Poole's Index, Reader's Guide to Periodical Literature, Monroe's Bibliography of Education, Work With Boys (monthly, Fall River), Georg's Catalogue (German), Reports of the Massachusetts Commission on Industrial Education, New York Report of Bureau of Labor Statistics, vol. 1, 1908.
